ME12 ... R/S

Remotely configurable digital pressure transducer
for use in explosive areas

Gas explosion protection Zone 2
Dust explosion zone 22

1 Product and functional description

1.1 Performance characteristics

Important features

- Can be configured
- Robust device model
- Highly precise
- Low hysteresis

Typical applications

- Relative pressure measurements
- Absolute pressure measurements

Application areas

- Procedural engineering
- Process technology
- Environmental technology

1.2 Product overview

The following provide an overview of the possible connectors and process connections. The code stated corresponds to the respective code in the order code.

Electrical plug

1.3 Use as intended

The ME12 is a pressure transmitter with a ceramic measuring cell for over-pressure and under-pressure and can be used for both relative and also absolute pressure measurements. The pressure transmitter can be used with non-aggressive liquid and gaseous media. Please see the technical data for the respective measuring ranges.

ATEX classification

Zone 22

ME12 pressure transmitters are suitable for use as 'Electrical equipment for use in areas with combustible dust', zone 22 - dry dust.

The units are identified with

UK CA Ex II 3D Ex tc IIIB T125°C Dc

Zone 2

ME12 pressure transmitters are suitable for use as 'Electrical equipment for use in areas with combustible gases', zone 2.

The units are identified with

UK CA Ex II 3G Ex nA IIC T4 Gc

1.5 Design and mode of operation

The pressure sensor work on the thick layer technology DMS principle. The measured pressure acts directly onto a ceramic membrane that deforms when under pressure. This changes the resistance of the attached DMS bridge. Electronics integrated into the device convert this bridge signal into an electronic output signal.

Every pressure transmitter is programmed according to the code in the order code on delivery. Also, the electrical connections can be used to configure the pressure transmitter, adapting it ideally to suit the process conditions. You will need a Transmitter PC Interface available as an accessory.

2.7 Parameters

The ME12 pressure transmitter is fully configured on delivery, however it can also be remotely configured on site. A PC, an interface, which is available as an accessory and the PC software **transmitter programmer** are required for configuration.

The EU13 with a USB interface is used for pressure transmitters with 2-line connections.

The following parameters can be set

Characteristic curve	Increasing / decreasing
Attenuation	0 ... 200 s
Offset correction	±25 %FS
Margin correction	±25 %FS

Signal limits	Current output (settable)
Upper limit	3.5 ... 22.5 mA
Lower limit	3.5 ... 22.5 mA
Error signal	3.5 ... 22.5 mA
